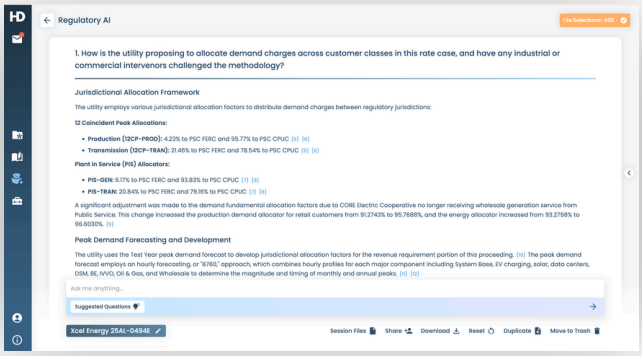
HData

Regulatory Intelligence for Large Energy Customers

Power is a significant operating cost that must be actively managed. The rate cases and tariff filings that determine what C&I customers pay are dense, disparate, and time-consuming to analyze.

HData helps organizations track and understand regulatory developments that affect energy costs, enabling faster intervention, stronger advocacy, and better-informed power procurement decisions.



HData Combines Centralized Regulatory Data with Powerful AI and Purpose-Built Tools to Accelerate Analysis

RATE CASE MONITORING

Track active and pending rate cases, surface proposed rate changes, and identify opportunities for advocacy.

PROCEEDING PREPARATION

Identify proceedings where cost shifts impact commercial and industrial customers, and research the arguments, positions, and precedents needed to prepare for potential actions and outcomes.

MULTI-JURISDICTION PORTFOLIO MANAGEMENT

Monitor regulatory developments, track rate exposure, and manage docket activity across your operating footprint.

REGULATORY RISK ASSESSMENT

Evaluate how commission decisions, legislative trends, and policy shifts could affect energy costs, tariff structures, or special contract terms across your operating markets.

HData

Regulatory Intelligence for Large Energy Customers

Platform Capabilities and Features

CENTRALIZED REGULATORY DATA

Library including 50 state PUCs, FERC, ISO and RTO committees, IRPs, transmission plans, and legislative data

COMPREHENSIVE COVERAGE

More than 20 million filings dating back to first public availability with daily data refreshes

GLOBAL FILE & DOCKET SEARCH

Advanced search and filtering to cast a wide information net or pinpoint specific entities and topics

SECURE FILE STORAGE

Upload or integrate proprietary files and data sources with enterprise-level, SOC-certified data protection

AI-POWERED ANALYSIS

Query up to 400 files at once in a grounded environment with all AI-generated responses validated using detailed source citations

REGULATORY MONITORING

Customize notifications for regulatory developments and new filings by docket, entity, jurisdiction, or topic
